DREAM MACHINE | Creative AI News & Insight { June 2026 - Issue 35 }

Pete Woodbridge ✓
Innovation Director | AI & Realtime Systems | Creative
Infrastructure | Future Production

June 23, 2026

Welcome to edition 35 of Dream Machine. Covering **AI in the Creative Industries**: Film, Music, Games, Media and Entertainment.

Created and curated by [DreamLab](#), a collective of artists, creative technologists, directors, games & software developers..... including Emmy winners, PhD researchers, and BAFTA-recognised talent.

You can also listen to the [Dream Machine Podcast](#) 🎧 and for deeper insights and full on analysis, along with some predictions and advice about where this is all going... check out the [Dream Machine: Artificial Intelligence and the Next Creative Economy](#) Book

**Editor's Pick: Unreal Engine's AI Future — From Tools to
Creative Partners**

Epic Games announced part of its approach for how AI will reshape game development this week — not just by adding AI features, but by embedding AI directly into creative workflows.

Announced at the State of Unreal, recent developments include **Unreal MCP** (Model Context Protocol), **LLM-powered tools** and video model integrations, point towards a future where creators can direct the engine through natural language, automate complex tasks and accelerate production workflows.

The goal is simple: reduce time spent on repetitive work — building assets, setting up systems, creating variations and debugging — so creators can focus more on ideas and storytelling.

The shift has sparked debate, with some developers concerned AI could replace established workflows or reduce the craft behind tools like Blueprints. But Epic's bigger opportunity may not be replacing developers — **it may be expanding who can become one.**

By lowering technical barriers, Unreal could enable more creators to build interactive worlds and utilise the epic ecosystem across games, film and immersive. For Epic, AI is not just a productivity tool play — **it could be a way to grow the entire creator ecosystem.**

Check out some of the latest tool releases from epic below.
