DREAM MACHINE | Creative AI News & Insight { August 2026 - Issue 41 }

Pete Woodbridge ✓

Innovation Leader | AI & Emerging Tech | Creative Tech | R&D
| Software Engineer

August 12, 2026

Welcome to edition 41 of Dream Machine. Covering **AI in the Creative Industries**: Film, Music, Games.... Created and curated by [DreamLab](#)

You can also listen to the [Dream Machine Podcast](#) 🎧 or go even deeper with the [Dream Machine: Artificial Intelligence and the Next Creative Economy](#) book, updated regularly in response to the insights in this newsletter.

Machine #41: Disney's J.A.R.V.I.S., AI's Generational Divide & The Future

Preview Aug 11 • Dream Machine - Creative AI

Saved on Spotify

Editors Pick: Disney & The AI you build on your own knowledge

Disney's JARVIS

One of the more interesting AI stories this week isn't a new model.

It's Disney's J.A.R.V.I.S.

Disney has reportedly rolled out its internal AI system to more than **2,000 Imagineers**, giving them access to decades of accumulated creative knowledge, processes and expertise.

The real opportunity is taking everything an organisation already knows — its **data, archives, intellectual property, workflows and institutional knowledge** — and making it accessible, searchable and useful in completely new ways.

For creative organisations, that will become a serious competitive advantage.

This is exactly the kind of work we do at [DreamLab – AI](#) and [DreamLab](#) — helping organisations, institutions and individuals **understand their own data, knowledge and processes, how to protect it, and how to turn it into AI powered advantage.**

We even call the system **JARVIS**..... but we probably shouldn't tell Disney that. 🤖 🧠

Introducing Dubbing v2

ElevenLabs

Watch on

- Dubbing v2 is now available on ElevenAPI, enabling developers to embed AI dubbing directly into their products and workflows [LINK](#)
- An interactive 3D scene creation, actor acting, and camera directing suite of custom nodes for ComfyUI. [LINK](#)

Stats of the week...

Luminate found a **48 percentage-point gap** in attitudes towards AI-generated music between 13–17-year-olds (+19% net interest) and 18–24-year-olds (-29%). [LINK](#)

Meanwhile, **more than 1 billion people now use Gemini every month** — with users increasingly talking to it, showing it things, uploading work, generating images and asking it to take actions. [LINK](#)

- It is the company's 14th product to hit that milestone along with Search, Gmail, Android, Maps, Chrome, Play, and YouTube.
- 63% are talking to it.
- 1 in 5 Gemini Live interactions involve a camera or screen.
- 38% of school-related requests include an attachment.
- 150M+ images are generated every day.
- And Gemini can now take actions across 40+ apps.

And in games..... **52% of game developers now say generative AI is having a negative impact on the industry.** That's up from 30% last year and just 18% the year before.. [LINK](#)

And yet AI adoption continues to grow behind the scenes.

Next Time...

If you've got any recommendations, opportunities or news we need to know about for our next edition please feel free to reach out.
